  - Students who want to pursue graduate training in psychology are advised to begin preparations early in their undergraduate careers. GPA, scores on the GRE, effective communications skills, preparation in the natural sciences and mathematics, and research experience (e.g., honors project, directed readings, laboratory experience) are the major criteria considered by admissions committees. To gain this research experience students are strongly encouraged to take the advanced research course - PSYC 3280.

- **Note:** A grade of "C" or better is required in all PSYC courses used to satisfy the 33 hours of psychology courses required in the major. In addition, a 2.0 cumulative GPA is required in all work completed in the Department of Psychological Science.

- **The Fulbright College writing requirement for non-honors students will be satisfied upon successful completion (a grade of at least "C") in either PSYC 3280 or PSYC 4283, each of which requires a final research paper written in American Psychological Association style.**

- **Required General Electives (hours vary; discuss with your advisor)**
