

Research Experience for Undergraduates (EcoREU)

Assessment and Sustainable Management of Ecosystem Services
at the Nexus of FOOD, ENERGY, and WATER

May 31-August 5, 2022

The EcoREU program explores the concept of sustainable management of ecosystems across cultures with a particular focus on Native American culture. Research projects provide a transdisciplinary approach to ecosystem assessment and sustainability.

What's the focus: water quality, sustainability, biofuels, and other topics related to the environment

How much does it pay: students will receive **\$6000** over the course of the summer, get free food and lodging, and even travel assistance

Who should apply: undergraduate students who want to get research experience

Native Americans and students from other underrepresented groups in STEM are encouraged to apply

Program dates:
May 31-Aug. 5, 2022

Application:
