Student to Attend Meeting of Nobel Laureates

Doctoral candidate **Abigail Hubbard** has been accepted as a young researcher for the 60th Interdisciplinary Meeting of Nobel Laureates at Lindau, Germany, June 27 to July 2, 2010. Hubbard was chosen in the top 500 of 20,000 young researchers who applied.

Originally from New Philadelphia, Ohio, she was a participant in the department's REU program in 2005, where she received the Tony Jude award for best research.

Hubbard has an undergraduate degree in chemistry from Kent State University and is pursuing her doctoral degree under the direction of Bob Gawley. She began her graduate studies here in 2007.

She spent the summer 2009 in New Zealand participating in the East Asia and Pacific Summer Institute on an NSF fellowship.

The Meetings of Nobel Laureates in Chemistry, Physiology or Medicine and in Physics have been held since 1951

and provide a globally recognized forum for the exchange of knowledge between Nobel Laureates and young researchers. Participants come from a variety of

national and scientific backgrounds.

The Lindau Meetings in natural sciences take place annually. For more information see: <http://www.lindau-nobel.de/>

Pulay Named to Academy

Peter Pulay

Distinguished Professor **Peter Pulay** has been honored once again for his research contributions, this time being named to the European Academy of Arts and Humanities.

He is known the world over for his work in molecular quantum mechanics. Pulay is also a Fellow of the AAAS and has received numerous awards including the Schrödinger Medal of WATOC (World Association of Theoretically Oriented Chemists) and Alexander Von Humboldt Senior Scientist Award.

In fall 2004, a symposium took place in his honor. His work was cited in the official background material released by the Royal Swedish Academy of Sciences in connection with the 1998 Nobel prize in chemistry.

Department Sets SURF Record

A record number of university undergraduates earned state Student Undergraduate Research Fellowships (SURF) for the 2009-10 academic year.

A total of 108 students from various disciplines were awarded funds for research projects. The awards more than doubled the 51 SURF grants received by the university in 2008-2009.

Nearly 25 percent of the 51 grants awarded to Fulbright College students were in chemistry and biochemistry. The 11 funded this year sets a department record. Since 1995, there have been 76 department SURF awards.
