

HDFS 3423H: Honors Adolescent Development

Second 8 Week Session (10/14-12/10)

Fall 2020

TH 4:30-7:15

3 credit hours

Instructor: Dr. Jen Becnel

Becnel@uark.edu

This class explores research on biological, cognitive, social, and emotional development during the second decade of life. Topics most relevant to teenagers, such as puberty and its consequences, family and peers, self and identity development, romantic and sexual development, and psychosocial adjustment will be covered.
